## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE three MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

### **DETAILED ACTION**

**The preliminary amendment dated 7-30-02 is acknowledged.**

**The claims included in the prosecution are 21-30.**

#### ***Double Patenting***

1. **The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).**

**A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).**

**Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).**

Art Unit: :1615

2. **Claims 21-27 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No. 6,120,799. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims in both said patent and instant application are drawn to compositions containing the cationic lipid and detectable label and instant claims encompass the angiogenesis inhibitor recited in the claims of said patent.**
3. **Claims 21-30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 12-13 of U.S. Patent No. 5,837,283. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims in said patent recites a method using the same composition now claimed.**

***Claim Rejections - 35 U.S.C. § 102***

4. **The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:**

**A person shall be entitled to a patent unless --**

**(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.**

Art Unit: :1615

5. **Claims 21-31 are rejected under 35 U.S.C. 102(a) as being anticipated by Wasan (Journal of Pharmaceutical Sciences, 85, # 4, April 1996).**

**Wasan discloses cationic liposomes containing a detectable label. The liposomes have sizes of 125-150 nm (note the experimental section on col. 1, page 428).**

**(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.**

6. **Claims 27-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Felgner (PNAS, 1987).**

**Felgner discloses Fluorescent labeled cationic lipid-DNA complexes (note col. 1 on page 7414).**

**(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.**

7. **Claims 21-31 are rejected under 35 U.S.C. 102(e) as being anticipated by DePrince (5,705,693).**

**DePrince discloses Fluorescent labeled cationic lipid-nucleic acid complexes (columns 27-28).**

Art Unit: :1615

***Claim Rejections - 35 U.S.C. § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 27-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Felgner (PNAS) or Wasan cited above.

Felgner, and Wasan as pointed out above disclose Fluorescent labeled cationic lipid-DNA complexes . The fluorescent labeling is for the purpose of identification of the cells which were transfected. However, it is deemed to be within the skill of the art to omit the active agent from Felgner, and Wasan if the sole purpose is just identify where the cationic liposomes are accumulating within the host system and not to transfect the cells in the host system.

9. Claims 27-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Folkman (5,837,682) in view of Felgner (PNAS) or DePrince (5,705,693) or Wasan cited above or vice versa (Felgner or DePrince or Wasan in view of Folkman).

Folkman discloses lipofectin-DNA complexes; the DNA sequence encodes angiostatin. The complex however does not contain a detectable label (abstract, column 39, line 4 et seq.).

Art Unit: :1615.

**Felgner, DePrince, and Wasan as pointed out above disclose Fluorescent labeled cationic lipid-DNA complexes . The fluorescent labeling is for the purpose of identification of the cells which were transfected. Therefore, one of ordinary skill in the art would be motivated to label the complexes of Folkman if the purpose is also to identify the cell populations transfected.**
